Mrs. Abigail Owen who lives just north of this city was stricken with apoplexy and paralysis between six and seven o'clock Monday evening and since that time has been unconscious. The Doctors do not hold any hope for her recovery. Mrs. Owen is almost 79 years of age and her health has been good for one of her age. She ate her supper as usual and took a walk out in the yard, came into the house and would have fallen had not one of her daughters been standing by. Her husband Isaac Owen died some ten years ago. She is a noble woman. Her friends hope for the best.

Gone With the Pins.

Where is the thrill of last night's fear?
Where is the stain of last week's tear?
Where is the tooth that ached last year?
Gone where the lost pins go to.

For last night's riddle is all made plain,
The sunshine laughs at the long past rain,
And the tooth that ached hath lost its pain—
That's what our troubles grow to.

Where are the clothes that we used to wear?
Where are the burdens we used to bear?
Where is the bald-head's curling hair?
Gone where the pins disappear to

For the style has changed and the clothes are new,
The skies are wearing a brighter blue
The hair doesn't snarl as it used to do,
And the parting has grown more clear, too.

Where are the bills that are peace distressed?
Where is the pin that the baby "blessed?"
Where are the doves in last year's nest?
Where have the pins all gone to?

On the old bills paid are the new ones thrown,
The baby's at school with her pins out-grown,
And the squabs are running a nest of their own—
You can't bring 'em back if you want to.

We can stand the smart of yesterday
Today's worse ills we can drive away
What's was and is brings no dismay
For past and present sorrow.

But the burdens that make us groan and sweat,
The troubles that make us fume and fret,
Are the things that haven't happened yet—
The pins that we'll find tomorrow.
—Robert J. Burdette.

Take Plenty of Exercise.

Exercise!
Allow a muscle to be idle for six months and it becomes useless.
There's only one way to grow—that is to exercise. Struggle develops; stagnation decays.
But, there's a great universal way to exercise—that's walking. It requires no special paraphernalia, no special toggery; it can be tried any where, anytime. It's a first class sport.

Our sturdy forefathers walked.
No fancy doctoring in their days.
No microbes; no germs; no medical fussing—nothing but wholesome good fresh air.

They are good food; rested when necessary; breathed fresh air—and walked. And that's a hard combination to beat!

Walk! Fill your lungs; stretch your legs; enjoy the scenery; get back to nature.

Walk!—Frankford Chronicle.

A little girl was walking along the street with her mother, when she saw a one armed man. It was the first time in her life that she had ever seen a man without an arm, and she wanted to know all about it. Her mother explained, in answer to her questions, that the man had probably met with an accident of some kind and that his arm would never grow back. The little girl thought for a moment and then said, "Well, if the Lord made us, it seems to me like He ought to keep us in repair"—Judge.
